Awesome!

. So after some initial crashing problems, I uninstalled and reinstalled Java and am enjoying the game. Despite the somewhat silly concept, it's a fairly solid shooter/racing game, especially for its generous price of €2.99.. Took way too long to review this cosmetic pack. Some of my favorite designs are in this one and I'm really glad I could support Klei once again. Will be buying any DLC they decide to push out, and I'm glad they're always dropping new content and designs for, at this point, an old game.

Product came as expected and promised.. Cool short game. Simple platforming and neat little puzzles. Challenging enough and not frustrating. Good option if you feel like playing something short and sweet. Art is really nice too but may get in the way since sometimes you think it's a platform or something. Good thing you spawn nearby. Pretty cool game overall.. Very short experience (15 minutes) but very nice story and a lot of details. There is a possibility for another chapter. Virtual room are very small and because of that, not very realistic but I know they choose this to make the game available for people with "standing only" mode.

Very good for a free demo. Try it!

. Haque is one of the most uniquely and genuinely fun games I've ever played. The writing is great and it's crazy addictive..

Positives

- + great graphics
- + great workout
- + fun gameplay

Negatives

- the game only has 2 small levels and finishes in 15 minutes
- the developers abandoned
- Score leaderboard is local only

I bought this game for 5 eurom which is about 4 euro too much for this overprices abandoned teaser demo game. While the game itself is fun, it's a big scam knowing that there are only 2 tiny levels of wave shooting.. Great racing game, if your looking for an arcade racer. its got deep options for your car. I love the way the cars handle on different tracks..

Abandoned game with bugs, that doesnt allow to play.. Great game!. Very good, very good.. Brilliant game ! Just started playing this, but already think it's great. Lots of customation, replayability - great concept, and reasonably prized ! Definitely recommended. i played 10000 hours and i em ze Comando of dis sharp shuter recomend dis game we costing alot ov many so i sell my family to buy dis and also my dog so reip snufls!. REPEAT. build the full game, her indoors loves it and would buy all day

. Garbage. Rail run shooter that is lackluster, boring, and just all around no good.. Abolsutely fantastic!

You really nailed the locomotion, you have proved that we dont require teleporting. I tried all 3 different locomotion modes, they were all excellent and all games should come with these choices. I really hope that all other games can use these modes that you have created instead of teleporting!

In the end the mode that i played with was the swinging of the arms to walk. As i got no motion sickness at all with this mode, i do wish though the walking speed was a bit faster, maybe you can allow us to set the speed we want?

The game itself was one of the most scariest experiences ive had, and trust me ive played almost every horror game out there, this game totally spooked me and at times i was just thinking why im putting myself through this :D

But being a horror lover i just carried on playing.

I can not wait for the full game to release, Octobar can not come soon enough! You have definetly got a first day purchase from me, i will be getting the full game as soon as its released!

Can not wait!! As an Indonesian, these illustration made me so happy because all stuff that had done there are actually just like my daily lives environment. With a great family, joyness, kindess, and rural athmosphere made me smiling for every illustration. So recommend it for you want to enjoy some good pictures of rural and sibling environment. :)
