[We Need A Dumber Pre-Built OS](#)

EXPO'70シリーズ
全5巻・ビューア付 ¥4,400

1. A Web OS based hackable phone will give you access to everything using Web Tech - The Palm Pre has been the Grandfather. Look for the release of the OVI Apps SDK to be released this year.
2. 3D Displays - It's SciFi, it's happening and you won't look like an idiot wearing your 3D glasses watching Avatar.
3. The Cloud moves to the edge. Not every media item that is produced on the phone can and will be pushed back to the cloud but instead stays on your or somebody else's phone's Terabyte HDD.
4. Mobile Payment. It's coming and it's coming hard. Think mobile2mobile payment. Paypal for your mobile phone.
5. Connected phones packed with sensors and crunching power will disrupt all kinds of sensor-based business models - Think Weather Prediction, Traffic probing, Pollution sensing, etc. pp.
